WHO WE ARE

**The largest seed producer
in Northern Europe.**

The company aims to become a leader in the retail seed and gardening market in Northern Europe countries and find its niche in the wholesale market of the EU countries.

We respect traditions and highly appreciate the professionalism. Our product group managers, retail networks sellers are experienced professionals, real experts of their work, and good advisers.

WE EXPORT to Europe and Asia.

WE SELL

Seeds of various vegetables, flowers, evergreen and ornamental plants, herbs and rare plants, bulb flowers, onion seedlings, seed potatoes, fertilizers and plant protection products, peat substrates, soils, mulch and many other products for hobby gardening.

Attractive and unique products - ecological seed tapes, plant labels in the packaging, making it easier to succeed in cultivation.

Specially selected seeds for everyone – balcony gardening, allotment gardens (community gardens), not to mention, those who love spices and especially those who wish to ecologically cultivate.

QUALITY – Environment is the keyword

Testing Fields

Together with the National Plant Services, we select the vegetables that give the best harvest, the ones that taste the best and that are least affected by plant diseases.

All seeds are tested and meet the ISTA's requirements.

Hermetic Packaging

The seed is packaged in a hermetically sealed package, therefore, ensuring that germination will occur during less time, even if the package is exposed to sunlight and moisture.

TESTING FIELDS

The Objective of the Research is

- to select the most suitable varieties in terms of yield size and earliness, resistance to illnesses, taste characteristics and decorative features.

The seeds are grown

- In the greenhouse
- In open fields
- In pots

During the 4 years of research 270 varieties have been tested:

- 80% - vegetable varieties and hybrids
- 10% - varieties of herbs,
- 5% - flowers seeds,
- 5% - lawn mixtures.

ECOLOGICAL SEED

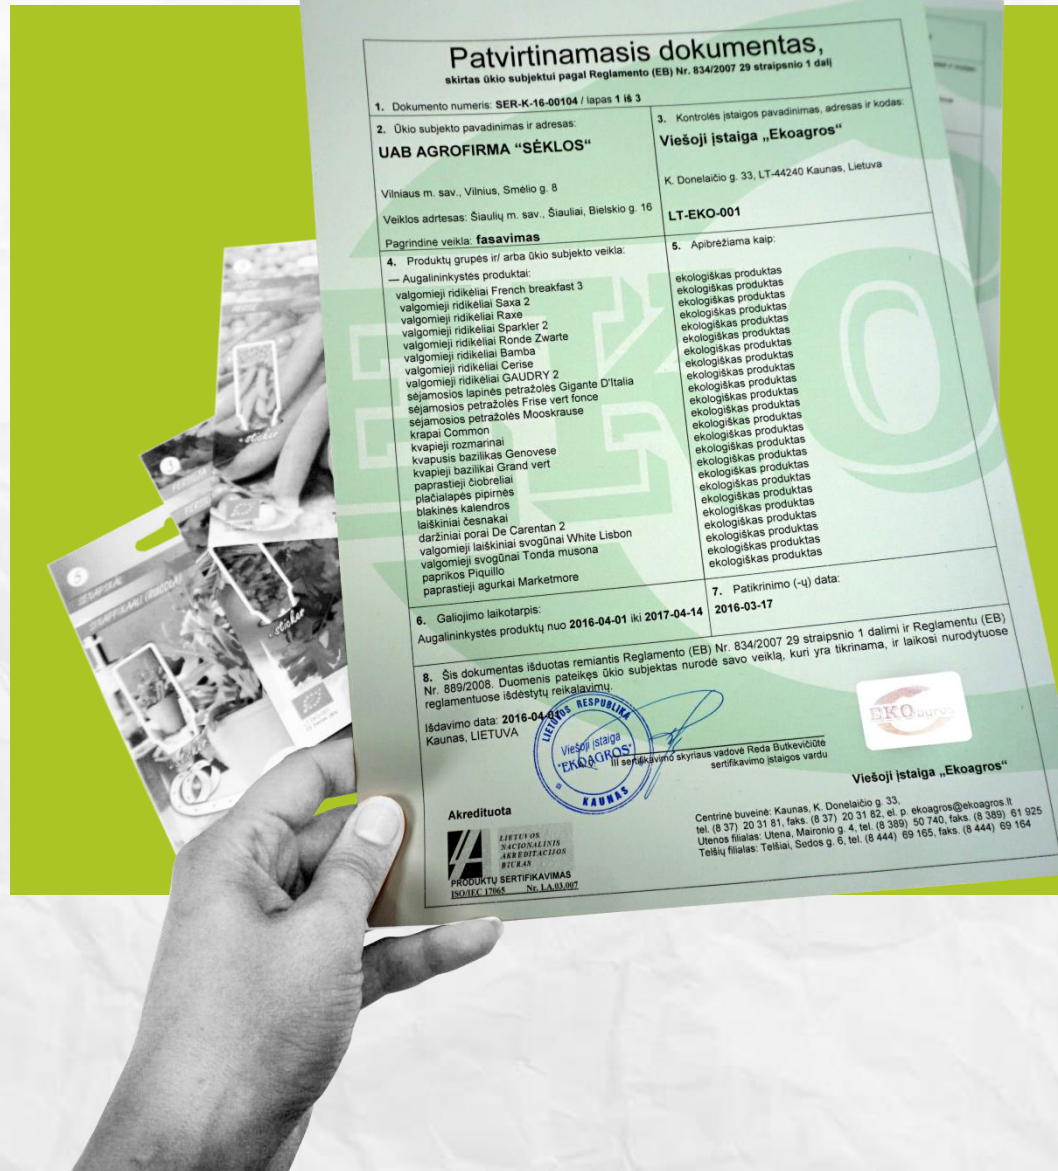

Seklos is certified to package ecological seeds.

The first company to offer ecological seeds on seed tapes for the Scandinavian Market and the Baltic states.

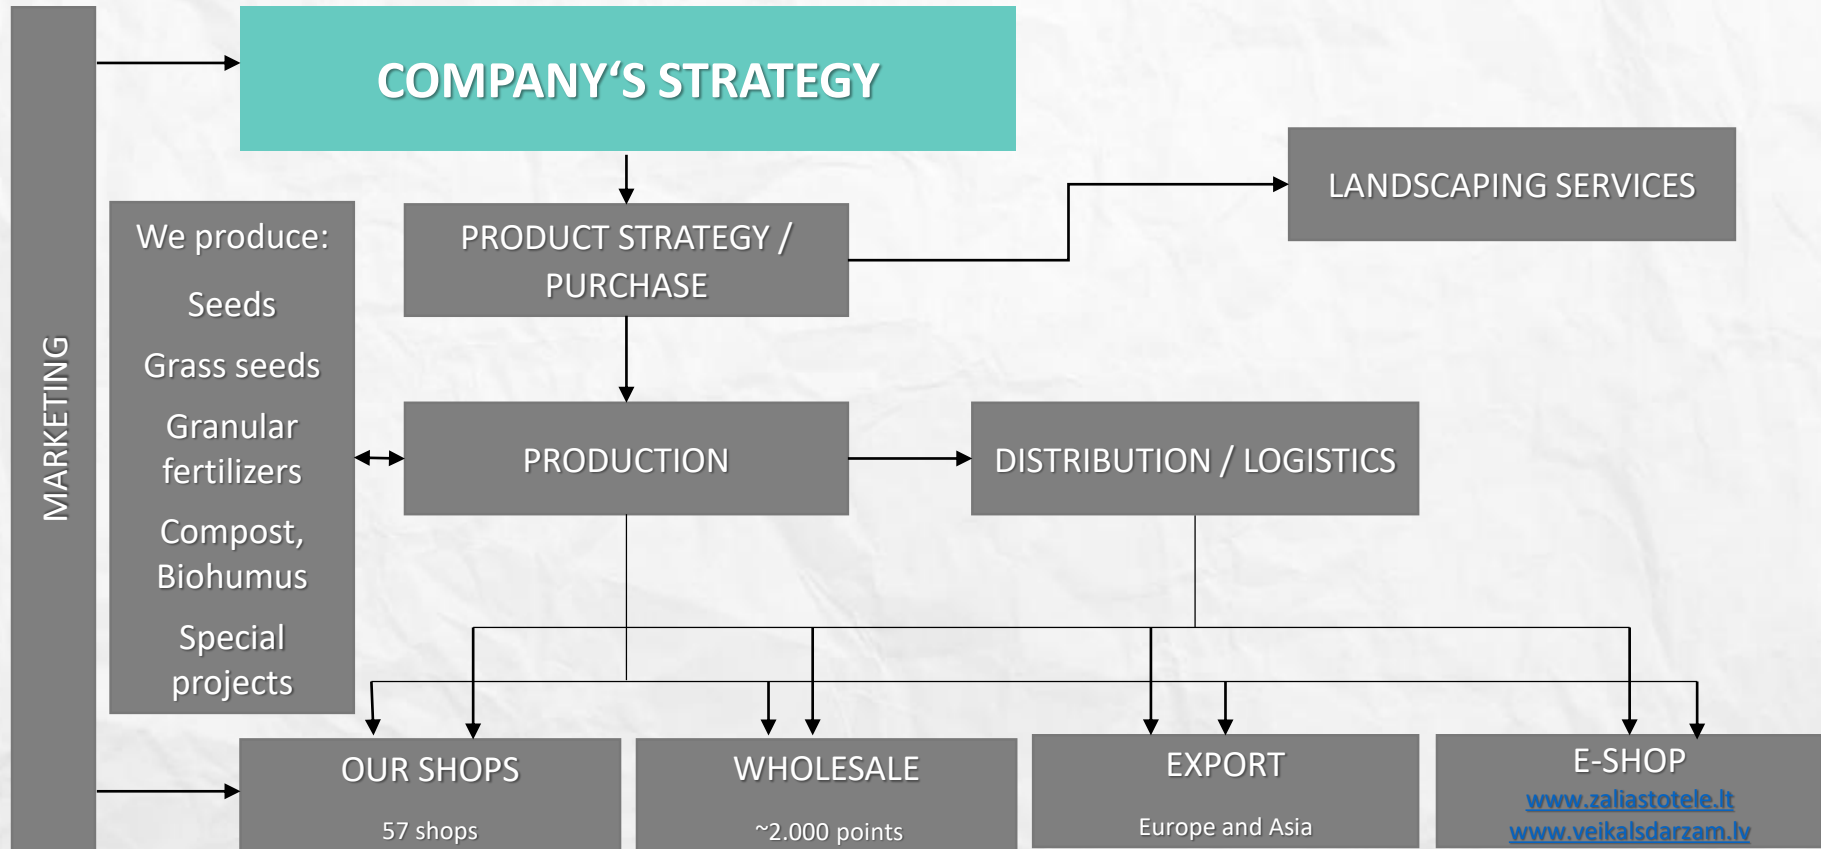

The first certified ecological seed producer in Northern Europe.

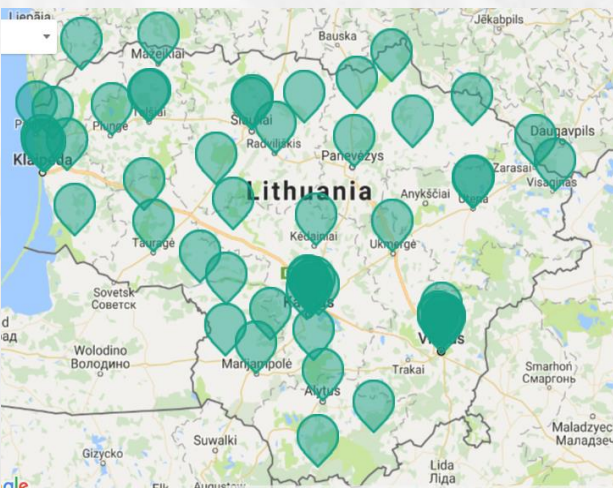

Seklos uses PEFC
certified paper for
packet production.

THE BIGGEST GARDEN CENTRE IN THE BALTCS

OUR SEED LINES

SEKLOS LINE

(189 variety)

A carefully selected range comprising 189 varieties of vegetable, flower and herb seeds. The assortment is divided into two groups:

TRADITIONALS - Well-known varieties that give a bountiful harvest for consumption, as well as for canning and drying.

URBAN GARDEN - Specialising in small scale cultivation – on the balcony, terrace, and allotment in pots or pallet flower borders.

All seed packets have labels inside, making it easy to remember which seeds were sowed. There are ecological seeds on tape in this line.

MIN TRÄDGÅRD MY GARDEN

(15 varieties)

The most popular varieties are vegetables, flowers and spices. Easy to cultivate with fast and easy germination. 15 different varieties that even children can cultivate.

Especially suitable for stores that want to create the optimal sales and income from a small store area.

Popular seeds at valuable price in eye-catching display! Can be presented as promotional line.

OTHER BRANDS

Lucia elite

Lucia Elite is very special and unique. All seeds in this line are carefully selected from the range provided by the seed industry leaders.

Green life

Contains the most diverse spice seeds, from standard to exotic. Seeds of herbs and rare plants are divided into 4 groups: Home garden, Bio best, Traditional and Micro greens.

Agronom

Only best selling varieties! The range contains many popular, time-tested varieties, such as Amsterdam 2 carrot, Cherry Belle radish, Harz Chinese asters grown since 1728, and many others.

Žalia stotelė

For those who are looking for a wide range and exclusive varieties - 300 of vegetables and more than 220 of flowers! Our range is divided according to the sowing time and allows you to select plants by season.

Bio – ecological seeds

Grown on organic farms, processed, packaged, labelled, stored, transported and sold in accordance with specific requirements.
